# Extech AN100 CFM Thermo-Anemometer Wind and CFM Meter AC119

Model Number: AN100

Extech AN100 CFM Thermo-Anemometer Wind and CFM Meter AC119

Manufacturer: Extech Instuments Corp

Extech AN100 CFM Thermo-Anemometer AC119
Measures airflow or air velocity, and temperatures to 500°F with infrared thermometer
The Extech AN100 thermo-anemometer offers simultaneous display of ambient temperature and air flow or air velocity. Up to 8 easy-to-set area dimensions can be stored in the internal memory of the Extech AN100 thermo-anemometer.
The Extech AN100 thermo-anemometer has a air velocity range from 0.9 to 67.2 mph (or equivalent) and features a 20-point average function for air flow and a super large LCD backlit display. The low friction 2.83" D ball bearing vane wheel on 3.9 ft cable produces a 3% velocity accuracy. Other features of the Extech AN100 thermo-anemometer includes data hold, min/max readings, and an auto power off.
The internal temperature sensor measures ambient temperature from 14 to 140°F.
The Extech AN100 thermo-anemometer ships complete with vane sensor with 3.9ft cable, 9V battery, protective rubber holster, and carrying case.
Applications of the Extech AN100 Thermo-Anemometers

- HVAC installation, repair, diagnositics, and optimization
- Fume hood testing, installation, and verification
- Ventiliation system installation, servicing, and analysis
- Environmental wind and temperature testing/analysis
- Boilers rooms
- Ionizer flow output monitoring
- Automobile aerodynamic testing
- Plant/facilities maintenance

Please note the factory collects sales tax in about half of all states and has a $25 min shipping charge for this item.
