Note that both Mytee and SteamBrite reserve the right to change exact specifications without notice. What does this mean? It means that we do not open your boxes and Mytee will change the components that they use to build your machine. We verify the model number and voltage that is stamped on the box. In early 2018 Mytee is in the process of changing the rear wheels and front casters to a different size and specification. Other changes might also take place. We do not guarantee exact color or shade of your product though usually these ship in the blue family. What Mytee does guarantee is that the performance and the product is new and comes with the full manufacturer's warranty with its national service center locations. In other words, this is a 500 psi pump with dual 3 stage vacuum in a dual 12 gallon body style with dual 50 ft 12-3 power cords, but the exact pump model or exact vacuum motor, pressure gauge, or switch that is installed in your machine can be different. In the last year these machine have been built with Pumptec pumps, Cat Pumps, and General pumps. These are all great pressure pumps. The vacuum motors have been consistent for many, many years with the same Electro vacuum motor used but this has not always been the case as some other brands have been used. This machine claim to fame is the vacuum. 230 CFM X 144" of lift = 33,120 vacuum units. This is impressive. If you want to consider faster cleaning with a 13", 14", or even 15" wide cleaning wand, that is OK and recommended with this machine. Since you only have two power cords to use, the majority of energy is used for the vacuum and a little for the pump. If you are going to move up to 14 or 15" wide multi jetted tools or power wands, please consider having us upgrade your machine to pressure feed auto fill for a little more. These larger tools use water twice as fast and a traditional 2 jet cleaning wand. In carpet cleaning fill takes about 10 minutes and emptying takes on minute. This eliminates the longer of the too so you only have to drain your machine. Mytee is also in the process of changing the rear wheels to 10" diameter and front casters to 4" diameter. Other changes can take place at any time.

Optional : Clean Storm Pressure Feed Auto Fill Conversion Kit (Dealer Installed) 20130409

This machine plugs in everywhere. You can run this machine in an office building or older homes that only has dual 15 amp breakers. All you have to do is turn down the water pressure a little bit. This machine does not have a heater because the size of the vacuum motors. If heat was added it would trip even a 20 amp breaker. If you want heat, please consider an external heater on a third power cord. You can purchase external heaters in 15, 17.5, and 20 amp styles. The other advantage to making the machine without a heater is that it is lighter than other heated or auto fill auto dump machines. 115 lbs dry use weight (no cords, no water) with all the extra handles installed on the machine means you do not have to purchase a ramp or hire a helper to load or unload your machine. The average maximum weight a healthy carpet cleaner can lift by himself is 150 lbs.
