Model Number: SVT28

AR Pump SVT28, Pressure Safety Regulator Valve, 4060 psi 194 degree

Manufacturer: Annovi Reverberi Pumps

AR Pump SVT28 Pressure Safety Regulator Valve

4060 psi or as low as 350 psi

194 degree F. Seals

6.6 GPM

Dual 3/8" Fip inlets

3/8" Fip outlet

No knob

Brass construction

used on SteamBrite truckmounts .

To put back together, small side of silver piston goes in the hole first, then the brass hat next so the hat looks the same as it is currently laying on the table when looking in the hole after installation, then finally the spring and the brass cap. If you need the pressure to be below 350 psi, you will need to grind a little mass off the spring.
