Model Number: 630052

Waste Tank FLoat Shut Off 2 Ball Cage Tennant Nobles 630052 1.75 in Diameter 4020485

Manufacturer: Tennant Nobles

Tennant Nobles 630052 Waste Tank Float Shut-Off &ndash; 2 Ball Cage, 1.75" Diameter

Part Number: 630052

Also marketed as: 86621310, 8.662-131.0

Replaced / Cross Reference: Tennant 4020485

This 2-ball recovery tank float shut-off cage helps protect the vacuum motor by restricting airflow when the waste/recovery tank becomes full. It is commonly used on Tennant, Nobles, BlueStar, Castex, and Green Machine automatic scrubbers and extractors.

Why Replace This Part?

- Helps prevent dirty water from being pulled into the vacuum motor
- Restores proper recovery tank shut-off operation
- Useful when the original cage is cracked, missing, clogged, or no longer floating correctly
- Small part that can help prevent expensive vacuum motor damage

Known Machine Fitment

Fits many Tennant and Nobles scrubbers/extractors including:

- Tennant Speed Scrub 17, 20, 24, 32
- Tennant T2, T3, T5
- Tennant 1510, 1530, 1610
- Tennant 5100, 5280, 5300, 5300DT, 5400
- Tennant T300, T300e, T500, T500e
- Nobles Strive, SS3, SS5, Speed Scrub 300, Speed Scrub 500

#### Important Ordering Note

Parts are machine-specific. Please compare your existing float shut-off, machine model, and serial number before ordering. Display images are for reference only; orders are fulfilled by the part number purchased.

#### FAQ

What does this float shut-off do?

It helps shut off or restrict vacuum airflow when the recovery tank is full, reducing the chance of wastewater entering the vacuum motor.

Is this the complete tank?

No. This listing is for the float shut-off / ball cage assembly only.

What are the alternate part numbers?

This part is commonly associated with Tennant Nobles 630052 and is also marketed under 86621310 and 8.662-131.0. Tennant also lists 4020485 as replacing 630052.

Will this fit every Tennant or Nobles machine?

No. It fits many Tennant and Nobles scrubbers and extractors, but fitment should always be confirmed by model, serial number, and original part number.
