This generator will give you 50% more output power than the BE-6500ER. It’s a great way to start up a 110 volt compressor or run your carpet cleaning equipment.

Product Number : BE-9000ER
Manufactured by: BE
ASIN: B0074IECVY
Electric Start! Just flip the rocker switch!
Two year Warranty (free replacement parts for 2 full years)
All parts for engine in stock

59.17 amp Output @ 120V Running amps
15HP PowerEase gas engine 420cc OHV engine
7100W Continuous power
Includes four 120V, one twistlock and one L14-30R 240V twistlock receptacles
Stainless steel control panel
Auto idle (save fuel, wear, and noise)

DC output of 12V and 8.3A
A reliable Electric Start Starting System
Three 120V 20A GFCI Duplex Receptacle and Two 120V Twistlock Receptacles 120V/240V
Fuel Tank Capacity of 25 Liters (6.6 gallons) and a max run time of 6.5 Hrs at full load. Up to 10 Hours 1/2 load.
Noise level at 7m of 78db
225 lbs.

FREE handle and wheel kit, FREE battery (Value $100)

Weight 216 lbs 28"X23"X23" Box

Also marketed under part numberBE-9000ERUSC

Generator rules:
Always ground the generator to either to the ground pin of the home electrical outlet and /or with a metal ground stake.
Always use the power evenly. All generators have two power producing sides. This means that a 7200 watt generator is really two 3600 watt generators. Please do not pull all the power out of one side and not the other. You will notice that their are six standard 120 volt outlets on the generator. 4 receptacles are on one side of the generator and 2 are on the other side. The best way to accomplish even electrical consumption is with the L14-30R connection to a distribution power adapter. Do not run E85 fuel. Use 87 to 91 octane. Use full synthetic oil and change oil every 100 hours. Always use electric clothes dryer plug converters as your first option for high amp drawing equipment. Using generators will shorten the life or your carpet cleaning equipment. Generators should be used as a back up only and not your main power source. Please note for longest life use ALL generators at 50 to 65% their surge rating. This means for longest life please use this generator at 4500 - 5500 watts or less. When you are finished using the generator, turn the fuel ball valve off and let the carburetor run dry so the generator will turn itself off.

Owners Manual .
Shipping is to a commercial location where there is a forklift or we can hold at the nearest trucking company terminal. Home Delivery surcharge $120 more
