Westpak 10-1460 12-Inch Dual-Jet Carpet Cleaning Wand with 1200-PSI Valve
Professional 12-inch stainless-steel extraction wand for portable extractors and truckmount carpet-cleaning systems. The Westpak 10-1460 combines a low-profile, double-bend wand tube with two solution jets, a soft-touch brass valve and a high-pressure solution hose. Its 1-1/2-inch vacuum tube connects to standard professional carpet-cleaning vacuum hose cuffs of the matching size.

Manufacturer: Westpak USA

Model / Part Number: 10-1460

Cleaning Width: 12 inches

Vacuum Tube: 1-1/2-inch outside diameter

Spray Configuration: Two jets

Valve: Soft-touch brass valve rated up to 1,200 PSI

Solution Hose: Rated up to 3,000 PSI

Wand Configuration: Low-profile double bend

Construction: Stainless-steel wand body and head

Assist Handle: Adjustable

Two-Jet Coverage with a 12-Inch Low-Profile Head

The two spray jets distribute cleaning solution across the 12-inch cleaning path while the stainless-steel vacuum head recovers loosened soil and moisture. The double-bend tube and low-profile head help the operator reach beneath furniture and work comfortably across open carpeted areas.

This wand is suitable for professional carpet cleaners using compatible portable extractors or truckmount systems. Always match the 1-1/2-inch vacuum connection, solution connection, operating pressure and jet configuration to your equipment before ordering.

Quick-Disconnect Coupler Selection

The selected quick-disconnect coupler is installed on the wand and included with your

Equipment: Carpet Cleaning Machines > Wand > 11 - 13 Inch Carpet Wands > Westpak 10-1460 Carpet Cleaning Wand 12in x 1.5 OD 2 Jet 1200psi Double Bend AW29 3000Psi Hose Karcher 8.600-061.0

Westpak 10-1460 Carpet Cleaning Wand 12in x 1.5 OD 2 Jet 1200psi Double Bend AW29 3000Psi Hose Karcher 8.600-061.0

purchase. The default selection is a 1/4-inch male brass carpet-cleaning-style quick disconnect. A 1/4-inch female brass carpet-cleaning-style coupler is available through the product-option menu for an additional charge.

Confirm which coupler gender mates with the end of your existing solution hose. The words male and female refer to the quick-disconnect connection—not the threads used to attach the coupler to the wand hose.

Correct Assist-Handle Position Reduces Operator Strain

Before adding a glide solely because the wand feels difficult to push, check the adjustable assist-handle position. Mount the handle at the highest practical point on the wand, stand upright and keep your chest parallel with the wand head. Proper handle placement allows the operator to push the wand forward during the dry stroke without unnecessary bending or twisting.

Watch our wand operation and assist-handle positioning video for a practical demonstration.

Optional Westpak 10-0890 PTFE Wand Glide

The Westpak 10-1460 accepts the optional Westpak 10-0890 12-inch PTFE wand glide, sold separately.

A compatible glide can reduce wand-to-floor friction and help protect tile, vinyl and other hard flooring when recovering water. It does not increase the extractor's vacuum power. Every service vehicle should carry a compatible glide so the technician is prepared for hard-floor water recovery without dragging the stainless-steel wand head directly across the floor.

For temporary hard-floor use, install the glide securely according to the glide manufacturer's directions. If the glide will remain on the wand for daily use, it may be sealed around the perimeter with the appropriate adhesive after confirming fit and operating preference.

Compatible Optional Glide
Westpak 10-0890 12-inch PTFE wand glide; sold separately

Included with This Wand

- Westpak 10-1460 stainless-steel 12-inch carpet wand
- Two factory-installed solution jets
- Factory-installed 1,200-PSI soft-touch brass valve
- Factory-installed high-pressure solution hose
- Adjustable assist handle
- Selected male or female brass carpet-cleaning-style quick-disconnect coupler

Not Included: Vacuum hose, external solution hose, extractor, truckmount and optional Westpak 10-0890 glide are sold separately.

Cross-Reference Information

The Westpak 10-1460 wand design has been sold with or associated with multiple professional carpet-extractor brands and catalog systems. Reference numbers encountered for this general wand configuration include AW29, Sandia 80-8008, American Extractor AE-W200LP, EDIC 1034H-110015MB / 1034H-110015FB and K¨rcher/Windsor 8.600-061.0.

Cross-reference numbers are provided for research only. Manufacturers may change valves, jets, coupler gender, hose assemblies or other components without changing the general appearance of the wand. Order by Westpak part number 10-1460 and verify the required connection and configuration before purchasing.

Operating and Safety Information

- Use only within the pressure rating of the lowest-rated component in the complete cleaning system.
- Relieve solution pressure and allow hot components to cool before changing jets, couplers or other parts.
- Inspect the valve, solution hose, jets and fittings before every use.
- Keep the jets directed toward the cleaning surface and away from people, animals and electrical equipment.
- Test cleaning pressure, heat and chemical compatibility in an inconspicuous area before cleaning.

WestPak 12in 1200psi Dualjet Dual bend w/Bypass

10-1460 Versus 10-1455

The Westpak 10-1460 uses a flexible solution hose rated up to 3,000 PSI between the trigger valve and the two-jet manifold. The similar Westpak 10-1455 uses rigid stainless-steel tubing in this location.

Important: The 3,000-PSI specification is the rating of the 10-1460 solution hose—not the recommended operating pressure of the complete wand. Maximum system pressure is determined by the lowest-rated component. This wand is equipped with a valve rated up to 1,200 PSI.
