Foster K6-4051, Sheer Defenseâ„¢ Mold Resistant, Clear Coat, 5 gal Pail

Manufacturer: Abatement Technologies

Restore and Protect Structures from Mold, Mildew and Bacteria Growth Caused by Water Damage
Foster Disinfectant and Fungicidal Protective Coatings help restore and protect structures from mold, mildew and bacteria growth resulting from flood and natural disasters. Foster products are preferred by contractors and specified by industrial hygienists because of their long term, proven performance and reliability.

Seal and Protect

Foster Sheer Defense™ 40-51 Mold Resistant Clear Coat
Foster Sheer Defense 40-51 is a mold resistant clear coat that provides excellent resistance to mold growth in mold remediation, construction and remodeling projects. The low viscosity of Foster 40-51 allows it to be applied by hand or with virtually any type of airless spray system. Foster 40-51 appears white when wet but dries to a clear finish allowing the original surface to be visible beneath the coating. It has a water resistant finish and is flexible and crack resistant. Foster 40-51 is ideal for use in a wide variety of applications including attics, wall cavities, crawl spaces, wood framing, floor joists, drywall and other building materials.
Part #: K6-4051. 5 gal.
