Manufacturer: General Pump

General Pump 100163 Centering tool for 12V Double "A" Groove Clutch Adapter Kit for 44, 50, 63 and WM Series Pumps

Product Description

The General Pump 100688 is a 12 Volt Double "A" Groove Clutch Adapter Kit for 44, 50, 63 and WM Series Pumps. The mobile clutch in typical water pump applications, the clutch is mounted on the input shaft of the water pump. Since the clutch has an integral puller, a belt is used as the input to the clutch. This belt is normally driven directly from an electric motor or a gas/diesel engine. When there is no power to the clutch, the water pump does not engage; however when power is activated, the clutch drives the water pump to initiate water flow. In this application, the General Pump clutch is mounted directly to a General Pump by using an adapter plate.

Product Features

Pulley Size & Type: 7"- A Groove, 24mm Shaft
Width: 2.25"
Torque After Burnishing 75-95 lbs
Power Requirement: 12 V, 47 Watts
Weight: 8 lbs
