Manufacturer: American Training Videos

American Training Videos Custodial Series 1010B High Speed Floor Maintenance- Manual Method [AMT-1010B]

Reviews the theory and practice of high-speed burnishing on resilient tile floors. This DVD is designed to place and maintain a layer of floor finish on top of the flooring material. This finish layer protects the floor from soiling and abrasions caused by traffic. All of the procedures in this training DVD involves maintaining this finish layer to provide for maximum protection and shine. Also covers spray buffing to remove spots, stains, scuffs and black heel marks. Explains equipment and chemicals including floor pads and drive blocks, applying “high-speed” finish, burnishing, and other related topics.
