American Training Videos Hospital Series 1057 Stripping and Finishing Hospital Floors

Manufacturer: American Training Videos

American Training Videos Hospital Series 1057
Stripping and Finishing Hospital Floors
[AMT-1057]

Demonstrates all the equipment, supplies and procedures to professionally strip and re-coat hospital floors. Reviews the steps environmental services professional should follow for stripping and finishing floors. Shows how to apply finish in two ways: Using mop marked for this use only or; by using floor finish microfiber mop applicator with special tubing to dispense floor finish from bag. Microfiber applicator system reduces labor cost by as much as 70%, reduces finish usage by up to 35%, easy to apply finish in corners and along baseboards, helps eliminate mops and buckets. The greatest value of refinishing is building resistance to soil and easier maintenance. The floor will also last longer, saving the building owner from having to replace it before its time.
