Manufacturer: American Training Videos

American Training Videos Healthcare Series 1089
High Speed Floor Maintenance
[AMT-1089]

Explains the theory and practice of high speed burnishing to restore resilient hard floors, and repair scuffs and marks without build-up. Describes how to extend the life of the floor finish and maintain a just finished "wet look." Reviews the necessary equipment and chemicals, including use of floor pads and drive blocks plus equipment maintenance. Includes: preparation, dust mopping, applying new finish, high speed burnishing, clean-up. All of the procedures in this training presentation involves maintaining this finish layer to provide for maximum protection and shine. Also covers spray buffing to remove spots, stains, scuffs and black heel marks.
