The Steel Eagle X-11 Recycle System is the latest addition to our Reclamation systems line of products. For use with all Fury 2400 Vacuum systems.
Increased efficiency of the X-11 is due to the innovative design with a greater water capacity allowing improved settling time for suspended solids which helps prolong the life of the polishing filters. Even greater efficiency and filter life is maintained by adding our primary separation tank for use as a pre-filter for the X-11.
Oleophilic (oil attracting) coalescing plates, reusable oil filtering foam media, oil absorption skimmer media and improved clarity with a four-step reduction polishing filter manifold removing suspended particles down to a five micron size at a rate of 11 gallons per minute.
