Clean Storm 3/8 in MIP x 1/2 in Barbed Brass Fitting (3gmpb08x06, 32016, Kaivac CPS20)
Description
The Clean Storm 3/8 in MIP x 1/2 in Barbed Brass Fitting is engineered for durable, leak-free connections in high-demand commercial cleaning and fluid handling systems. Manufactured from premium solid brass, this precision-threaded connector bridges standard 3/8-inch male NPT/MIP threaded ports with 1/2-inch inner diameter flexible hoses or tubing. Designed to withstand continuous industrial use, high chemical exposure, and elevated operating pressures, it is an essential replacement component for commercial pressure washers, auto-scrubbers, extraction equipment, and Kaivac cleaning systems.
Features

- Industrial-Grade Brass Construction: Offers superior resistance to corrosion, high temperatures, and chemical degradation for extended service life.
- Precision MIP Threading: Standard 3/8-inch Male Pipe (MIP/NPT) threads ensure a tight, secure, and leak-resistant threaded connection.
- Secure Hose Retention: The 1/2-inch hose barb features defined ridges designed to grip flexible tubing firmly, preventing blow-offs when clamped.
- Versatile OEM Compatibility: Directly replaces and crosses over with various commercial cleaning part numbers, including Kaivac CPS20 and part 32016.
- Bulk Savings Available: Eligible for "Buy More, Save More" volume pricing for maintenance teams, contractors, and fleet operations.
