Details:
Mytee's airmover design features a sleek new look, built-in cord wrap, stackability, and 3 operating speeds. An optional transport handle package is also available. Featuring a collapsable luggage style handle and 4" wheels, it makes transporting easy, and does not interfere with stacking. Perfect for carpet drying, ventilation, water damage work, and much more.

The current default color is Blue but is not garranteed.

We do not open these boxes and do not have way of knowing what color you will recieve or if your fan is going to be 2.4 amps or 4 amps, or two speeds or three. The current default is two speed, blue color, 2.4 amps, but we know Mytee has made fans with 4 amp, 3 speed switches, and what ever color you can think of.
