Note the Mytee M3 and the Mytee 1003DX use the same vacuum motors and get the same vacuum performance.

Note that both Mytee and SteamBrite reserve the right to change exact specifications without notice. What does this mean? It means that we do not open your boxes and Mytee will change the components that they use to build your machine. We verify the model number and voltage that is stamped on the box. We do not guarantee exact color or shade of your product though usually these ship in the blue family. What Mytee does guarantee is that the performance and the product is new and comes with the full manufacturer's warranty with its national service center locations. In other words, this is a 500 psi pump with dual 3 stage vacuum in a dual 12 gallon body style with dual 50 ft 12-3 power cords, but the exact pump model or exact vacuum motor, pressure gauge, size of heater, style of caster and wheel, color of the vacuum lid, does exhaust blow at the bottom or back wall, or brand/color of switch that is installed in your machine can be different. In the last year these machine have been built with Pumptec pumps, Cat Pumps, and General pumps. These are all great pressure pumps. The vacuum motors have been consistent for many, many years with the same Electro vacuum motor used but this has not always been the case as some other brands have been used. Constant changes are made on designs to improve performance as well as based on vendor supplied parts. Mytee's warranty states: Mytee may make changes in products it manufactures and markets at any time; these changes are made without obligation to change, retrofit, or upgrade any product previously sold or manufactured.
