# Mytee Trex K 15 Rotary Extractor Power Wand with freight inlcuded as well as Shazaam Kryptonium and Brushes

consider a truck mounted extractor or portable carpet cleaning machines that are auto fill and auto dump. Then because the machine is hooked to the sink, you need a higher performance machine with at least Dual 3 Stage vacs, Triple 2 stage vacs, quad 2 stage vacs, or dual 6.6 vacuums to run the longer hose runs. Please do not try to operate 14" and 15" wide wands with machines that have 5 stages or less of vacuum.

Note: Because this wand has 6 jets on it, most machines will experience a pressure drop between pump standby pressure and use pressure. Example: Pressure gauge might be set on 450 psi but when you squeeze the trigger on the tool, the use pressure might fall under 225 psi. Suction feed machines will experience a larger pressure drop than pressure feed machines. If you own a suction feed auto fill extractor, you can convert it to pressure feed if you want to improve cleaning results. All makes and brands of portables can be converted from suction feed to pressure feed.

There were two parts missing according to the parts list. One was the H061 2' vac hose x 22 and the and the other, G082A sleeve, vac relief, 2", spin.

Both these parts are not missing rather been removed from the box as they are no longer included. So far the last two customers that have purchased this wand have both called SteamBrite and we have already confirmed this is not a packaging error. Your 2" truckmount or portable vacuum hose it to hook direct to the wand. No leader hose with vacuum relief is included or needed.
