Drieaz F413 T Trade Show Return REVO Revolution LGR Compact Craw Space Industrial Dehumidifier AC628 Low Hours 111995

Manufacturer: Legend Brand

Drieaz 111995 Revolution Trade Show Return Craw Space LGR Dehumidifier F413 (ultra Low Hours)

The breakthrough Revolution™ LGR dehumidifier:
LARGE performance in half the size
Only 1 unit at this price. Ultra Low Hours Trade Show Return. Mint Condition. Please allow for extra delivery time encase unit might be at a trade show at time of purchase!
Dri-Eaz has broken through the size vs. performance barrier with the new Revolution's Precision Control™ Technology and the most compact dehu design ever! The half-sized Revolution pulls an amazing 80 pints at AHAM and a full 8 pints at 80/20. Its space-saving design lets restorers pack more drying power into their trucks, saving extra trips and boosting profitability. We're building units now, but limited stock is available so place your order today!

Smaller size means bigger advantages!

As fuel costs rise, your customers look to transport more equipment on each trip. The compact Revolution can help them fit more drying power in less space, and save them time and money.

And, it's profitable for you, too! As a user, you can keep more of these in inventory and use less space.

Features

- Optimized water removal using Precision Control Technology drives best full-range water removal and best low-grain performance in its class
- The smallest, lightest Xactimate "Large" category dehu ever – more water removal than other units 2–3 times its size!
- Delivers "Large" dehu performance yet fits where others don't –

The First compact LGR Dehumidifier

Steambrite Supply

Drieaz F413 T Trade Show Return REVO Revolution LGR Compact Craw Space Industrial Dehumidifier AC628 Low Hours 111995

The Revolution LGR uses the latest sensor technology to automatically monitor and display the dehumidifier’s inlet and outlet conditions. Used together with the HygroTrac remote monitoring system (purchased separately), the 2800i transmits this information to a secure website for viewing from any computer with internet access.

Here's just a few of the advantages the Revolution LGR offers you:

Innovation

- Portable LGR with built-in remote sensing capability
- Industry-leading performance at AHAM and at low grains – and even at high temperatures.
- All critical components easily accessible for simplified maintenance
- Durable, made-in-USA build and limited lifetime guarantee.

When the Revolution LGR is used with the HygroTrac remote monitoring system, you receive these added benefits:

Insight into drying conditions

- View minute-by-minute jobsite temp, RH, grain depression online anywhere
- Set up automatic alarms – and get notified by text message and e-mail
- Thoroughly document job progress

Intelligence

- Make better drying decisions
- Allocate personnel and equipment more effectively
- Track dehu inventory automatically

The LGR F413 refrigerant dehumidifier offers exceptional performance across the full range of jobsite conditions – in low humidity environments and even at high temperatures (up to 125°F). The unit is engineered for the heavy demands of water damage restoration and rental use. A rugged rotomolded housing and durable construction make this Dri-Eaz dehumidifier a top choice for professionals everywhere.

The outbound air can be directed using 12" flexible ducting

Dry Smart, Dry Fast

Dri-Eaz dehumidifiers are well known for their market-leading performance, durability and reliability, as well as their easy maintenance and long service life. In 2009, we introduced a unique, powerful control panel and sophisticated internal sensors with our new line of i-Series dehus. You first saw these in the LGR 2800i and 3500i, then the 7000XLi and now the Revolution LGR. It is this patented control system that truly sets Dri-Eaz dehumidifiers apart.

Benefits to Customers
The i-Series control panel makes monitoring jobs easier and ensures more efficient drying.

Customer benefits include:

* Easier documentation for drying jobs
* Optimized drying across the full range of conditions
* More accurate information to help guide equipment use

The information in this email will help you and your team highlight the benefits of i-Series control panels with your customers. It's the feature that truly differentiates Dri-Eaz dehumidifiers from all other competitive products on the market.

How It Works

The controller uses data from the onboard RH and temperature sensors to deliver maximum performance in all operating conditions.

This technology allows Dri-Eaz dehumidifiers to deliver maximum water removal throughout the restoration process. Whether it is the high humidity and cooler temperatures typically found at the beginning of the job or the drier, warmer

Steambrite Supply

Drieaz F413 T Trade Show Return REVO Revolution LGR Compact Craw Space Industrial Dehumidifier AC628 Low Hours 111995

conditions near the end of the job, i-Series dehumidifiers remove as much water as possible in all conditions automatically and with no user intervention.

Because the built-in sensors are constantly in the airstream, they are always acclimatized. This saves time compared to hand-held meters, which can require 10-15 minutes to acclimate. In addition, the data gathered by the sensors is automatically displayed on the illuminated screen for convenient viewing at a glance.

Dri-Eaz designed the control panel to sit in a protected recess within the housing and added rugged membrane switches. This guards against accidental damage and prevents unintended setting changes. Users can easily switch the system to humidistat mode for specialty environmental control, and access a variety of system data, including total run time, plain language error messages and diagnostic information. The panel can be set to display in English, Spanish, French or German.

i-Series Control Panel:
Enhanced Dri-Eaz Technology for Superior Dehumidifier Performance and Monitoring Efficiency

Clear Messaging for Improved Equipment Operation

* Inlet/outlet temp and RH
* Job hours and reset
* Life hours
* Coil/evaporator temp
* Defrost cycle (shows when defrost is in progress)

Steambrite Supply

Drieaz F413 T Trade Show Return REVO Revolution LGR Compact Craw Space Industrial Dehumidifier AC628 Low Hours 111995

* Humidistat mode (runs until target RH level is established)
* Plain language system messages for easy troubleshooting

For superior performance, easy monitoring and legendary reliability, more and more customers are choosing the i-Series dehumidifiers from Dri-Eaz.

The Revolution LGR with Precision Control Technology ™

Since its release one year ago, the Revolution LGR has proven itself to be tough, reliable AND a performance leader. At half the size of other Xactimate "Large" dehumidifiers, restorers recognize that the Revolution's compact design packs more drying power (and profits) into each vehicle. Its Precision Control Technology ™ automatically optimizes water removal in all conditions to boost its performance beyond competitive products, putting it in a class by itself.

It is so popular that some techs refuse to leave for a job without their Revolutions! Below is a great testimonial about how the Revolution LGR helped a Canadian restoration company keep their techs happy and put smiles on their customers' faces!

Read why the Revolution is this customer's favorite dehu
"I'm a first response manager at our company. A while back we were going to buy some Evolution dehumidifiers from our dealer. He told us to wait and check out the new Revolution which was coming out in a few months. I'm sure glad we did. What a great product. We bought 20 of them on the spot. It's the only dehu my technicians want to take on their trucks. We love its performance that is every bit as good as the Evolution and its size that lets us use it in small areas and crawlspaces. My techs won't take out any other dehus now.

What I like most is the intelligent design of the units. It's so easy to see how they're working on jobs. My techs even take pictures of the control panel and send it to each other on jobs so they can compare the drying process between machines. They actually send me short videos that they've taken of themselves with the Revos on jobs and in their trucks. They love them that much. You know a product is great when

Drieaz F413 T Trade Show Return REVO Revolution LGR Compact Craw Space Industrial Dehumidifier AC628 Low Hours 111995

your techs want to be photographed with it!

Over the last two years I've shifted to buying only Dri-Eaz dehus. We used to buy a lot of Phoenix products but now I'm 100% sold on Dri-Eaz. I think your dehus are the best on the market: super durable, great performance and now with the Revolution more portable for jobs in cramped areas like stairwells, crawlspaces, and small rooms. I've told my manager that we're not going to buy any other dehus except Dri-Eaz. He trusts my buying decision because he sees how well they work for us. I just got approval from him to buy 20 more Revos. You know that it's got a pretty amazing product for me to tell my manager that I won't buy anything else. We are out on drying jobs all the time so we want to make sure we've got enough Revos for every job. My techs won't take out any other dehu now. I actually had one crew tech refuse to take them off the truck until I promised him he could use them on the next job. They are the best. Thank you Dri-Eaz for making such an excellent product."

-Kyle Zenklusen, Groupe RPL, Canada
