Manufacturer: Nikro

Duct Mask 24” x 200’ Roll

Product Description

Duct Mask comes in 8 inch and 24 inch rolls. Duct Mask is an adhesive backed film that provides a quick temporary seal on registers and grilles. Duct Mask provides quick, custom, one-step installation. The adhesive backed film can be easily removed from the register without harming the register's factory finish.

Our premium grade protection film is a full thick polyethylene film with adhesive on the outside of the roll, making it easy to apply. It's excellent for protection during painting jobs, renovations, moving, open houses, winter floor protection, and much more. Film stays in place a minimum of 30 days and up to 2 months with easy removal and no residue.
