ONLY Item 3 in photo

Sales tax collected in all states.

Replacement is larger than original and no longer fits inside of fuel pump box housing.  
We supply a metal strap to secure to van wall/floor.

Original discontinued by Legend brands, this is a substitute to get back up and running.

-->.

Optional

Note: Many truckmounts need a primer bulb installed to help push all the air out of the system after changing the fuel pump.

This has a built in check valve to assist in the fuel not draining back into the van fuel tank once fuel pump is no longer turned on.

OK to leave installed after installation.

Truckmount Fuel and Gasoline Primer Bulb with Check Valve 1/4 Inch Barbs
