Manufacturer: Prochem

Leather Cleaner
Prochem’s Leather Cleaner is formulated with mild cleaning agents to effectively and gently remove soils and embedded oil and grime from leather. Cream formulation for easy application.

DESCRIPTION: The first step of Prochem’s two-step leather care system. Proper cleaning and conditioning removes soil, enhances
the rich appearance of leather and helps extend the life of the leather.
Prochem’s Leather Cleaner is formulated with mild cleaning
agents to effectively and gently remove soils and embedded oil and grime from leather. Powerful enough to remove difficult soil, but
gentle on leather surfaces. Cleans leather thoroughly before conditioning with Prochem Leather Conditioner.
A two-part system cleans and preserves leather better than on-step products. Cleaning removes oils and conditioning restores oils, so
a two-step process gives better results than a one-step process.

FEATURES:
• Effectively and gently cleans protected leather
• Mild cleaning agents, mild pH
• Cleans leather thoroughly before conditioning
• Cream formulation for easy application

WHERE TO USE: Use to clean pigmented or protected leather – the most common leather finish for leather upholstery, vehicle
interiors, luggage and accessories, shoes, boots, belts, handbags and other leather surfaces.

USE DILUTION: Ready to use, no dilution necessary

USE DIRECTIONS:
1. Shake well before using. Ready-to-use product, do not dilute. Pre-test in an inconspicuous location for colorfastness, darkening or
texture change.
2. Recommended for smooth, finished, pigmented leather. Pre-inspect leather condition for cracking, stains, cuts or damage. Not
recommended for unprotected leathers such as suede or nubuck. Avoid application

onto wood or other surfaces.
3. Brush leather to remove loose soil. Apply a small quantity of Leather Cleaner onto a clean, slightly damp white terry cloth, gently
clean a small area of leather. Pay special attention to removal of soil from stitching, creases and corners.
4. Wipe and rinse surface with another damp towel to remove soil and cleaner. Towel dry.
5. Rinse towels in clear water as needed to remove soil buildup.
6. After cleaning, condition the leather with Prochem's Leather Conditioner (E675) to soften, restore and help protect leather.
DO NOT FREEZE

COVERAGE: One ready-to-use quart cleans approximately 100 square feet. Coverage will vary depending on soil level and thickness
and absorbency of leather.

USAGE TIPS: Not for use on unprotected leathers such as nubuck or suede. These leathers will be damaged.
