Tips and Additional Information

Always place the space heater on a firm, level, and non-combustible surface during operation. Maintain a safe clearance of at least three feet from flammable materials such as furniture, pillows, bedding, papers, and curtains. Never block the air intakes or exhaust grilles. Ensure the unit is plugged directly into a standard 120V wall outlet; avoid using extension cords or power strips to prevent electrical overload. Unplug and allow the unit to cool completely before cleaning or storing.
