Question: What am I going to see in difference between the Mytee LTD5 VS the Mytee LTD3?

Answer: The Mytee LTD5 does not have a heater in it but does use larger 3 stage vacuum motors. While both the LTD extractors use 3 stage vacuum motors, the LTD5 vacuum motor are conical shaped on the bottom, pull more electricity and do a

>

better job gulping the air which in turns means drier carpets. Advantage would come with using a power wand, like the Mytee T-Rex because with the larger 15" wide cleaning path the extra vacuum can be a real plus. The advantage of the LTD3 is the heater during us of lower flow applications. Example mattress cleaning, upholstery cleaning, auto detail cleaning, or even using a standard two jet wand. The heater will raise the temperature more than 18 degrees and will double the cleaning efficiency. When choosing between the two, you can also consider a the best of both worlds by purchasing the LTD5 and add a separate heater on a third power cord with the purchase of an external heater. By removing the heater from under the hood the machine is lighter and easier to lift in and out of the service truck. By adding an external heater, you will double your cleaning performance without having to sacrifice smaller vacuum motors.

Question: What do most cleaners purchase? LTD3 or LTD5?

Answer: LTD3 outsells the LTD5 because the heater is included.

Question: What is the biggest difference between the Mytee M12 and the Mytee LTD12?

Answer: Mytee LTD12 uses larger vacuum 3 stage 20 amp vacuum system (instead of 2 stage- 15 amp vacuum system in M12) motors but removed the smaller 200 psi Aquatec pump and pump heater. Since the LTD12 has adjustable water pressure you can still turn the pump pressure down to 250 psi for upholstery cleaning. Please use 'Internal Spray' or other 'bi-directional' truckmount grade upholstery cleaning tools/wands with this machine. Traditional 'open spray' and 'closed spray' tools would not be recommended. There is no heater in the LTD12 machine but on the heated Mytee M12 only work at 200 psi. Since most people prefer 500 psi for carpet cleaning, both the M12 and the LTD12 are cold (non heated) machines at this pressure. Both machines use building supplied hot tap water to clean carpets at 500 psi. Mytee M12 is 15 gallon tank machine while the Mytee LTD12 is a 12 tank system. With auto fill and auto dump, the tank size really does not matter. The Mytee M12 uses 12 and 5" wheels, while the LTD12 uses 10 and 4" wheels. Both machines are too heavy to lift by yourself and would require team lifting or using a ramp for loading and unloading. In summary the LTD12 would make a better tile and carpet cleaning machine over the M12 but the M12 makes a better heated upholstery cleaning and auto detail machine than the LTD12. They both can pressure wash cars so you need to figure out what services you are going to perform mostly.

You'll need a good Tile & Grout Wand to go with this Machine. [Click Here!](#)
