RHG T-4060 Tucker 4-Stage Commercial Reverse Osmosis / Deionization Cart

Model Number: T-4060

RHG T-4060 Tucker 4-Stage Commercial Reverse Osmosis / Deionization Cart

Manufacturer: RHG Reach Higher Ground

Tucker 4-Stage RO/DI Cart T-4060

Tucker's commercial work horse!
This system will produce more water than others making your cleaning time faster!
The Tucker® - The 4060. Most every system on the market uses a 40" RO Membrane that can supply 1 pole on line pressure.
Using (2) 40" RO Membranes gives you more flow and capacity, but the size and weight makes it completely impractical in a mobile application.
@ Tucker® we have the unique opportunity to produce 30" RO Membranes that produce nearly the same water as the leading 40" RO Membranes on the market and when we combine 2 of them you get the performance of 80" or RO Membrane, but in a much more compact design.
Hows that? We use much lower operating pressure RO Membranes than anyone else in the market.
This RO Membrane technology is ONLY available in Tucker® branded systems and all other systems simply can't compare.
@60 PSI this unit produces 1.5 gallons per minute @ 70 degree water temp
@80 PSI this unit produces 1.91 gallons per minute @ 70 degree water temp
w/ the RHG 110v booster pump this unit produces 2.3 gallons per minute @ 70 degree water temp
Weighs approximately 95 pounds

Product Dimensions:

18 inches wide measured from the outside of the wheels

42 inches tall

User Manual

User Manual (SPANISH)

Optional:
Replacement Filters for this unit are as follows:

20066-C - 4 x 30" Filter Cartridge - Carbon Pre-Filter
20066-RO - 4 x 30" Max-Flow Reverse Osmosis Membrane
20066-DI - 4 x 30" Filter Cartridge - DI Resin Post-Filter
