RHG RO/DI Booster Pump System- 110v 12025

Manufacturer: RHG Reach Higher Ground

RHG RO/DI Booster Pump System- 110v 12025

Looking for more water volume and/or pressure from your RO/DI system?

Unlike the cheap alternatives offered by others, this system is designed specifically for RO/DI systems and will last you much longer than cheaper 'boost' pumps.

Made by RHG Products - a Proven Leader.

This electric booster system will provide you with 110 PSI and multiple gallons per minute out of your water system.

This allows you to work well above 40' as well as run multiple operators off of just one system.

System includes a simple inlet female garden hose fitting and a male garden hose outlet fitting.

Connect the water supply to the inlet of the pump and the inlet of your pure water system to the outlet of the pump. This will dramatically increase performance.

Works great with:

Tucker 4-Stage RO/DI Cart T-4060
