HydraMaster 000-163-716 Evolution Hand Upholstery Tool
US Products TRD-UPHGL-01

EVOLUTION GLIDED UPHOLSTERY TOOL

The EVOLUTION Upholstery Tool was designed to smooth airflow and boost water recovery performance as compared to the harsh angles of a steel tool. Best of all, the glided head moves across the upholstery fabric better and increases water recovery.

The Evolution Glided Upholstery Tools has a rotationally Molded Head with a Delrin® Glide. The 4″ head a single angled jet spray. This durable, rotationally molded tool is lighter than conventional steel upholstery tools, reducing hand and wrist fatigue in upholstery cleaning. The Evolution Upholstery Tool was designed to smooth airflow and boost water recovery performance as compared to the harsh angles of a steel tool. Best of all, the glided head moves across the upholstery fabric better and increases water recovery. Features of the Evolution Glided Upholstery Tool include:

- The cleaning angle of the single jet shears across the fabric rather than directly down onto it greatly reducing your chances of over-wetting.

- Rotationally molded to reduce weight and increase durability

- Laminar like airflow design improves airflow, increases extraction performance, and reduces drying time.

- Ergonomically designed to reduce operator fatigue and ensure proper recovery when cleaning surfaces with unique geometry.

- Delrin glide is mounted to the rotationally molded tool head for airtight fit and no slippage

- Plastic glide is less likely to develop burrs than a steel tool head which could damage delicate upholstery fabrics. Also, glide can be replaced when worn

- The recommended cleaning solution pressure for the tool is 40-80 psi. The valve is rated to 1200 psi. The part number is 000-163-617
