Model Number: 8.640-055.0

Karcher Taz Windsor Radiant Replacement Complete Aluminum Pad Driver 8.640-055.0 With Velcro Plate

Manufacturer: Karcher Pressure Washing

Karcher Taz Windsor Radiant Replacement Complete Aluminum Pad Driver 8.640-055.0 With Velcro Plate

Use #3 Philips Screw driver.

Damaged screws can cause further damage.

Mount the brush with the same countersink screws used for mounting the driver plates.

NOTE: Tighten the screws sufficiently to avoid disengagement of the brush from the machine during operation

To avoid stripping the screws do not over tighten.

An electric screwdriver with a clutch will ensure that stripping will not occur.

Attaching and Removing the Driver Plates Put the machine base in an upright position, sitting on the foot of the bumper.

Remove the driver plate by removing the four countersink screws in the center of the plate using an electric screwdriver.

Attach a driver plate to the machine base by lining up the holes of the driver plate with the appropriate threads of the bearing retainer ring.

It is recommended to align the threads of the bearing horizontally to the ground.

Put the four countersink screws through the holes of the driver plate and first screw them into the bearing retainer ring threads manually.

Then, tighten the screws with an electric screwdriver

Use with
