Karcher B 40 C Bp Auto Scrubber 24v 105 Ah Batteries Scrub Deck Sold Separately 9.841-120.0

WALK-BEHIND FLOOR SCRUBBER B 40 C/W Bp (roller)

The B 40 C/W walk-behind scrubber has a host of technical refinements and innovations for the primary purpose of making work as simple and convenient as possible.

The B 40 C with brush assist and W with traction drive scrubbers feature: a 10.6 gallon fresh and recovery tank-in-tank design, interchangeable modular disc or cylindrical roller scrubbing heads,

33.5" vacuum squeegee and Karcher's Intelligent Key system.

The KIK system enables the facility manager to create a unique cleaning profile, making it easier to train users and operate the scrubber.

KIK is used to set varying levels of authorized access by means of color-coded keys; yellow, grey and red; for operators, facility managers and technicians, respectively.

Facility managers can set parameters such as travel speed, brush speed, motor output or cleaning solution output to suit the needs of the cleaning task. An operator's key carries out the pre-determined settings, needing only to select their desired cleaning program from a rotary knob.

As a result, only the required amount of energy and cleaning agent is used.

Karcher's B 40 W Bp walk-behind scrubber dryer is available roller brush or disc pad system which includes a pre-sweep function for coarse particles. It's 55 cm working width, maintenance-free batteries (24 V, 105 Ah), variable traction drive (forward and reverse) and KIK key system offer outstanding user friendly cleaning results with added protection against incorrect operation. Extra features include it's eco!efficiency mode, extending battery life, tank rinsing system for hands free cleaning of the dirty water tank, auto-fill function for convenient filling of the water tank and DOSE cleaning agent dosing system. This machine is available with a range of different equipment and features, e.g. different batteries, cable version, without traction or with 45 cm working width.

The B 40 C with brush assist and W with traction drive scrubbers feature: a 10.6 gallon fresh and recovery tank-in-tank design, interchangeable modular disc or cylindrical roller scrubbing heads, 33.5" vacuum squeegee and Karcher's Intelligent Key system.

FEATURES AND BENEFITS

3 batteries to choose from

>

Battery types: maintenance-free 70 Ah (C5), low-maintenance 80 Ah (C5) or maintenance-free 105 Ah (C5). Also available as a mains-operated version.

The charging curve of the built-in charger is perfectly adjusted to the various battery types.

For a long battery life.

Auto fill-in

Time-saving filling of the fresh water tank.

Filling via the fresh water hose stops automatically when the tank is full.

Brush head with rollers

With 45 or 55 cm working width.

High contact pressure for perfect cleaning results.

Perfect for structured surfaces.

EASY Operation

Simple to use.

The basic functions are controlled with the EASY switch.

>

eco!efficiency mode

For significantly reduced energy consumption and substantially longer battery runtime.

The eco!efficiency mode is extra quiet and optimal for noise-sensitive areas (e.g. hospitals or hotels).

Easy handling

Simple handling thanks to clear control elements with colour-coding.

Simplified use and shortened teach-in time.

Traction drive

Optionally with traction drive. Infinitely variable forward and reverse operation.

The maximum speed can be preset.

Individually configurable device

Brush heads, squeegees, mains or battery operation and additional equipment details are freely selectable.

Perfect adaptation of the machine to cleaning requirements.

Efficient solution

>

Innovative KIK system

Yellow key for operators, grey key for supervisors.

Every key can be individually set to the language of the operator.

Reduced service costs thanks to less operating error.

Pre-sweeping attachment

With integrated sweep bin for coarse particles.

Protection against blockages on the squeegee. For perfect suction.
