Description

The Brush Pro 17" is an industrial counter rotating brush machine

Bottom line: you need a quality machine. The Hydro-Force Brush Pro was built for the professional customer--for those that need a machine that will run for 12 hours a day without asking for time off on Friday. Designed to withstand the rigors of extreme commercial cleaning, the Brush Pro will outlast, out-clean and out-perform any encapsulation machine on the market.

Features

Industrial Strength Construction

- Durable stainless steel body outlasts all other materials

Steambrite Supply

Hydro-Force MH170 Counter Rotating Brush Pro 17 Clean Pro-35 Encapsulation Machine CRB 1665-2644 124665 13152270

- New motor is 50% stronger than previous models

- Reputation - 20+ years of building the industry's most durable machines for encapsulation

Versatility

Use the machine that does it all. Clean both carpet and hard surfaces equally well with one machine

CARPET

- Compound dry cleaning
- Encapsulation dry cleaning
- Pile lifting
- Dry soil removal

HARD SURFACES

- Floor washing
- Scrubbing/drying
- Tile and grout cleaning

RUGS

- Splash-water proof construction is IP 54 certified allowing you to use the Brush Pro in 1 to 1.5 inches of water for scrubbing submersed rugs

Super quiet operation!

Superior Cleaning

- Brush Pro, prespray and dry compound are Carpet and Rug Cleaning Institute (CRI) certified for deep cleaning.
- Heavy-duty motor spins brushes at an incredible 380 RPM to quickly and thoroughly clean all sides of the carpet fiber.
- Included Renovators allow you to collect soil that normal vacuuming is unable to remove. This makes for a great demo. Have your customers vacuum right before you use the Brush Pro for dry soil removal and they'll be amazed at how much additional soil you remove.
- Cylindrical brush agitation carries the soil from the bottom of the pile to the top so it can be encapsulated and removed later through vacuuming. Pads drive the soil deeper into the pile and leave "blooms" that have to removed later.

Steambrite Supply

Hydro-Force MH170 Counter Rotating Brush Pro 17 Clean Pro-35 Encapsulation Machine CRB 1665-2644 124665 13152270

• Pads are not effective at cleaning uneven surfaces like grout lines, while the Brush Pro excels at removing soil on difficult-to-clean surfaces.

Simplicity

• The Brush Pro is a machine that can be used by anyone. Simply pull back the handle to start and begin cleaning carpets at a much faster rate than standard hot water extraction.
• Lightweight construction and small footprint. It also makes cleaning around furniture and other obstacles incredibly easy.

Specification

Weight:	43 lbs
Motor:	600W/110V/60 Hz
Brush Rotation:	380 RPM
Sound Level:	57.8 db
Cleaning Capacity Compound:	Up to 1,500 sq. ft/hr
