Electrical Converter 240V 4 wire 60 amp CS8269 Plug 120V 4 Gang GFCI 8 outlets Breakers Generator Adapter 73946112

Model Number: 73946112

Electrical Converter 240V 4 wire 60 amp CS8269 Plug 120V 4 Gang GFCI 8 outlets Breakers Generator Adapter 73946112

Manufacturer: Clean Storm

Electrical Converter 240 volt 4 wire/prong 60 amp CS8269 Plug 120 volt 4 Gang GFCI 8 outlets Breakers Generator Adapter 73946112
Temporary power distribution box
Construction spider box
This converter is perfect for the water damage technician. Designed to plug into your 12000+ watt surge generate that has the SC8269 Plug. Provides up to 8 outlets to use. 4 gang GFCI and 4 Twenty amp breakers. Designed to run under 60 amp total load (15 amps per outlet). Please note you must ground your generator to use this (see below)

Please note that it is super important to evenly pull power out of both sides of a generator. YES, all generators are two generators cut into two sides. Example a 12000 watt run generator is two separate 6000 watt generators. It is not ok to pull all the power out of one side. Most generators make it impossible to even pull power out of both sides because they do not have enough outlets. This converter solves this problem.

This converter has a total of eight 120 volt female ground fault receptacles! Each pair of receptacles are protected with a built in push button resetable 20 amp circuit breaker. This ultra compact design is you answer to installing the number of air movers and dehumidifiers in the home without the worry about tripping breakers in the rest of the home. Most restoration contractors use this device to run the dehumidifiers, and use the customer's regular wall outlets to run the air movers. (remember dehumidifier placement is not relevant to drying productivity as long as the blower motor on the AC/Heating system is turned to the 'On' position.) Just think, no more lost rental because the home does not have enough 'juice' to do the job right. This converter can also be used to operate other high amp drawing industrial equipment, like pressure washers and multi-corded carpet cleaning machines. Generator cable is 3 feet long . Weight 6 lbs.

The photos to the right are another example of a L14-30P style. This webpage is for the CS8269 P style.
Please allow 2 weeks for build as we do not stock the 14-60 Plug in the building and have to order it to replace the current plug.
Perfect item for the Winco WC12000HE Industrial generator that has the NEMA 14-60R receptacle installed.

Note: User assumes all responsibility on use. It is the users responsibility to check the inbound voltage, outbound voltage, and total amp draw to verify these are not

Electrical Converter 240V 4 wire 60 amp CS8269 Plug 120V 4 Gang GFCI 8 outlets Breakers Generator Adapter 73946112

going to be overloaded. The user agrees to test the amp draw of any appliance or machine that they plug into these converters to ensure they are not being overloaded. Meters are cheap and mistakes are expensive. You can purchase a meter at https://www.steam-brite.com/voltage-meter-mulitester-p-6259.html
User agrees to hold Steam Brite, its employees, and agents harmless in the event of any use of said use of converter. The user agrees to not hold SteamBrite and all employee against any problems that arise out of the use of said converters.
Remember, just because it plugs in does not mean it is OK to use!
If you do not think you will be able to properly ground the generator, you will have to purchase this same converter without the GFCI outlets because the GFCI outlets will realize you are not grounded and not let you use this device. Please let us know if this is the case.
