Manufacturer: Husqvarna Equipment

Husqvarna K6500 Chain Saw Electric Prime Products K 6500 18 Inch Cutting 20 lbs 967108501

K 6500 Chain is equipped with high frequency PRIME<sup>®</sup> technology, making it a very powerful electric chain cutter. The high power output, well-balanced body and low vibrations make this machine very efficient and easy to use. With K 6500 Chain it is possible to cut 450 mm deep from one side, making this machine a great complement to wall saws to avoid over cutting at corners. It is also ideal for cutting irregular or small openings (as small as 11x11 cm). The PRIME<sup>®</sup> product range enables you to combine the system that is most efficient for your business. K 6500 can be used with either PP 65 or PP 220 as a power source. Expand the system as your needs develop.

Note when operating on single phase 240 volts you are using 3120 Watts of power. When operating on 3 phase 240 volt current, you are operating on 3600 Watts of power.

Most 120 volt power tools use a max of 1440 watts of power.

This means that Husqvarna Prime products will provide 116% more power, speed, and performance than standard 120 volt wall tools when using the single phase option and 250% more power one three phase current.

240 volt three phase option offers 15.38% more power, performance, and speed over single phase use.

Single phase 240 volt current is available at every job site in the USA, Canada, Mexico, and Japan with the optional power supply pack below.

>

480 volt 3 phase 10 amp offers 14,400 Watts of power to your prime tools.  
That's 10 times the power of 120 volt tools and more power than most fuel fired tools!
