Model Number: 20200706

Pumptec 20200706, M9135 Motor With rectifier And With Base Group, (Replaces M35, M35-8, and M70) Frame 30

Manufacturer: Pumptec

M9135 Motor With Base and Rectifier / no pump head

Replaces M35, M35-8, and M70 Motors
For Pumptec Series 112V, 113C, and 114T Pump Heads
Motor, 1.5 amps, 120 VAC, 7lbs
Frame 30

If you order the M9135, keep in mind it requires a bridge rectifier to operate

The original M35 and M35-8 motors did not need or require the rectifier. The M70 and the M9135 does require this and is included in this page on this webpage.

Please consider purchasing a cam bearing too as the originals will be hard to remove.

Compare to current or past OEM associations:

US Products 56113119

MP-M35-EA

Esteam 512-510

PMP-M70

Kaivac PMA217

Sometimes the factory replaces this with a M8235 with a built in rectifier combo.

Package Includes:

Pumptec M9135 Motor Only (Replaces Discontinued M35 Motor Only
M35-8) CIM 1/7 HP 120V 30 FRAME 2000 rpm

>
