Clean Storm 20200709, 5A Thermal Circuit Breaker for Pumptec Water Pump, Panel Mount

Model Number: 20200709

Clean Storm 20200709, 5A Thermal Circuit Breaker for Pumptec Water Pump, Panel Mount

Manufacturer: Clean Storm

Clean Storm 20200709, 5A Thermal Circuit Breaker for Pumptec Water Pump, Panel Mount

Description

Protect your Pumptec water pump system from electrical overloads with the Clean Storm 20200709 5 Amp Thermal Circuit Breaker. Designed for panel mount installation, this heavy-duty, push-to-reset breaker acts as an essential safeguard against current spikes and overheating. Once the system cools down following a trip, simply push the button to restore power without needing replacement fuses. Reliable across both AC and DC applications, it ensures continuous, low-maintenance protection for high-demand pumping applications.

Features

- Dual Voltage Compatibility: Operates safely with AC currents up to 250V and DC currents up to 32V.
- Push-to-Reset Operation: Convenient thermal mechanism allows quick reset after cooling down—no replacement fuses required.
- Panel Mount Design: Easy installation directly onto control panels for clean integration and quick monitoring access.
- Pumptec Compatibility: Specifically designed to protect Pumptec water pumps from low-voltage overload damage.
- Durable Construction: Built to endure rigorous commercial and industrial equipment environments.

Specifications

Brand
Clean Storm

Part Number / MPN
20200709

Clean Storm 20200709, 5A Thermal Circuit Breaker for Pumptec Water Pump, Panel Mount

Amperage Rating
5A

Voltage Rating (AC)
Up to 250V AC

Voltage Rating (DC)
Up to 32V DC

Breaker Type
Thermal

Reset Type
Push to Reset

Mounting Type
Panel Mount

Application
Pumptec Water Pumps & General AC/DC Circuits
