Clean Storm AK32X7-8, Sheave Pulley, 3.2in OD x 7/8in Fixed Bore, A Section Belts
Description
The Clean Storm AK32X7-8 Sheave Pulley is a high-performance drive component designed for reliable power transmission in industrial, commercial, and pressure washing machinery. Precision-engineered with a 3.2-inch outer diameter and a 7/8-inch fixed bore, this pulley delivers consistent torque and smooth rotational power transfer. Built specifically for single "A" section (4L) V-belts, it is manufactured from durable cast iron to ensure resistance against wear, vibration, and thermal expansion under continuous duty.
Features

- Precision Construction: Cast iron body provides optimal balance, durability, and resistance to operational wear.
- Fixed Bore Design: Features a accurately machined 7/8-inch bore with integrated keyway and set screw support for high torque transmission and security.
- V-Belt Compatibility: Engineered for standard "A" section (also compatible with 4L series) V-belts.
- Smooth Drive Operation: Provides efficient speed ratios while reducing vibration and belt slippage across various motor speeds.
