Esteam 2629-0205 Bio Enzyme Decontaminant 4 Gal CASE 4 Gal Replaces Groom Solutions CD505GL-4 Odor Neutralizer

Model Number: 2629-0205

Esteam 2629-0205 Bio Enzyme Decontaminant 4 Gal CASE 4 Gal Replaces Groom Solutions CD505GL-4 Odor Neutralizer

Manufacturer: HydroForce

Esteam 2629-0205 Bio Enzyme Decontaminant 4 Gal CASE 4 Gal Replaces Groom Solutions CD505GL-4 Odor Neutralizer
Description:

Bio Enzyme Decontaminant contains enzymes, surfactants, fragrances, bacteria, and an abundance of special odor counteractants. This unique formulation will work on almost all urine damage. Extreme cases, usually as a result of months of neglect, can be treated with additional steps.
FEATURES

- Neutralizes urine
- Breaks down and digests contaminants
- Removes most urine stains
- Permanently eliminates existing organic odors

RTU Ph 7.0
DIRECTIONS

- Inspect surface to be treated with a UV light or other urine detection device to ensure all affected areas are located.
- Test for colorfastness or dye stability in an inconspicuous area prior to application.
- Shake gallon or mix pails and drums before use as bacteria and enzymes have tendency to settle to the bottom of the container.
- Dilute 1 to 4 up to 1 to 8 with lukewarm water in pump or electric sprayer or injection system. If using a truckmount with a Hydro-Force Injection Sprayer, adjust machine to lowest heat setting.
- For large or heavily contaminated areas, product may be mixed in a bucket and applied directly to affected area.
- For best results, solution must come in contact with carpet, backing, pad, or any other affected area. Odor modification is immediate. Standard dwell time for most situations is only 15-20 minutes. For extreme situations, increase up to 1 hour. Avoid over-wetting water sensitive surfaces.
- For best results, flush affected areas thoroughly with Water Claw Injection Tool.
- Clean affected area as normal if needed after treatment.
- Bio Enzyme Decontaminant may be injected with a syringe at the 1:4 dilution after cleaning to assist with any lingering odors at pad level.

Esteam 2629-0205 Bio Enzyme Decontaminant 4 Gal CASE 4 Gal Replaces Groom Solutions CD505GL-4 Odor Neutralizer

Malodor Modifier has been proven to be extremely effective in correcting pet odor problems such as urine, feces, vomit and in the removal of organic related staining. Malodor Modifier produces enzymes, (complex organic substances formed in the living cells of plants and animals), as catalysts for the decomposition of organic related odors and related staining. It eliminates the source of organic odors naturally. Malodor Modifier contains performance enhancing ingredients which increase the efficiency of the enzymes. It also helps initial odor knock down and provides immediate odor control.

Unlike other enzyme producing deodorizers, Malodor Modifier also contains a special encapsulating and bonding deodorizing additive which enhances its effectiveness with any residual odor after initial treatment is accomplished. For all water safe surfaces: Carpets & rugs, Drapes, Tile, Trash containers, Plastic, Wood, Mattresses, Clothing, Vinyl, Upholstery, Concrete, Etc.
Features:

• Enzyme producing deodorant with catalysts and encapsulants for maximum odor control treatment.

• Enhanced to speed up enzyme treatment process.

• Contains encapsulating and bonding additive that creates permanent barrier against odor production.

• Ideal for pet urine deodorization treatment

Specifications:
Appearance: Clear Liquid
Odor: None
Specific gravity: 1.009
PH: 7.5
Vapor pressure: 17.5
Vapor density: 0.670
Instructions:

• Always pre-test carpet or fabric to be treated for colorfastness first.

• Shake well before using

• Remove excess waste material.

• Mix 1 part solution with 2 parts water. In some severe situations it can be used full strength on areas that are wet.

Esteam 2629-0205 Bio Enzyme Decontaminant 4 Gal CASE 4 Gal Replaces Groom Solutions CD505GL-4 Odor Neutralizer

• Saturate spray or pour on problem area. Malodor Modifier begins working immediately, however varying dwell time is required depending on severity of the situation. You may want to consider injecting mixed solution into carpet with syringe or Injectimate system

• Extract area thoroughly.

• Consider post application light spraying of treated area. Malodor Modifier will not contribute to rapid re-soling. Aromafresh Deodorizer can be added up to 1 part to 8 parts of Malodor Modifier to boost odor removal.

• Repeat procedure if necessary for persistent problems.

• Note: Do not use with water above 120° F, bleach, disinfectants, antimicrobials, or harsh chemicals. They will make the product less effective.

Safety:
Keep out of reach of children!

Prior to using this or any cleaning product, make sure employees read and understand the hazard information found on the product label and Material Safety Data Sheet (MSDS). The label and MSDS will also provide information on handling precautions, protective equipment and first aid instructions which might be appropriate for this product.
