DryMAX XL Condensate Pump Kit, Replaces 4039839-01 and 4039532-01

Phoenix 4042075-01 DryMAX XL Condensate Pump Kit, Replaces 4039839-01 and 4039532-01

Model Number: 4042075

Phoenix 4042075-01 DryMAX XL Condensate Pump Kit, Replaces 4039839-01 and 4039532-01

Manufacturer: Phoenix

SUGGESTED PRODUCT NAME:

Phoenix 4042075-01 DryMAX XL Condensate Pump Kit, Replaces 4039839-01 and 4039532-01

SUGGESTED META TITLE:

Phoenix 4042075-01 DryMAX XL Condensate Pump Kit

SUGGESTED META DESCRIPTION:

Genuine Phoenix 4042075-01 condensate pump replacement kit for DryMAX XL dehumidifiers. Replaces pump numbers 4039839-01 and 4039532-01. Limited stock.
-->

Phoenix 4042075-01 DryMAX XL Condensate Pump Kit

Genuine Phoenix replacement condensate pump kit for compatible DryMAX XL dehumidifiers. This kit replaces earlier pump part numbers 4039839-01 and 4039532-01.

Limited-stock service part: Please verify the dehumidifier model, serial number, and original pump number before ordering. Do not order by appearance alone.

Product Details

Manufacturer

Phoenix Restoration Equipment / Therma-Stor

Current Part Number

4042075-01 (also referenced as 4042075)

Previous Part Numbers

4039839-01 and 4039532-01

Part Type

Condensate pump replacement kit

Intended Equipment

Phoenix DryMAX XL dehumidifiers

Equipment: Restoration > Dehumidifier > Rotomold Wheeled Dehumidifiers > Phoenix 4042075-01
DryMAX XL Condensate Pump Kit, Replaces 4039839-01 and 4039532-01

Phoenix 4042075-01 DryMAX XL Condensate Pump Kit, Replaces 4039839-01 and 4039532-01

Condition
New genuine OEM service part

What This Kit Does

The condensate pump removes water collected by the dehumidifier during operation and sends it through the drain hose. Replacing a failed or unreliable pump helps restore automatic water removal so the dehumidifier can continue operating without repeatedly filling its internal reservoir.

Kit Contents

- Factory replacement condensate pump assembly
- Mounting plate/bracket
- Associated wiring, tubing, and fittings supplied with the factory kit

Refer to the product image for the supplied kit configuration. Manufacturers may revise component appearance or included installation hardware without notice while retaining the same service-part number.

Fitment

Designed for applicable Phoenix DryMAX XL models. Compatibility can vary by production date and serial number. Before ordering, compare the machine data label and existing pump number with the numbers shown above. If the identification label is unclear, contact Steam-Brite with a photo of the complete data label for assistance.

This listing is for the pump kit only. The dehumidifier, external drain hose, float switch, control board, and other parts are not included unless they are pictured as part of the factory kit.

Installation and Troubleshooting

- Disconnect the dehumidifier from electrical power before opening the cabinet.
- Inspect the drain hose, fittings, check valve, reservoir, and float switch before assuming the pump has failed.
- After installation, test both automatic pump operation and the machine's manual PURGE function.
- Service should be performed by a qualified technician familiar with commercial dehumidifiers.

Ordering notice: All purchases are fulfilled by the manufacturer part number ordered.

Product images are for reference. Electrical and service parts are generally not returnable after installation or connection, so confirm compatibility before opening or installing the kit.
