Clean Storm Hot Water Pressure Washer is electric powered and uses diesel fuel to heat the water—this is often referred to as an oil fired burner system. All systems that use or burn a fuel should be operated outdoors or properly vented.

Features include an industrial motor that is totally enclosed and thermal overload protected, industrial triplex plunger pump with ceramic plungers and stainless steel valves is equipped with low pressure chemical injection and system is protected by unloader valve and secondary pressure pop off. Burner system includes a rust free fuel tank, schedule 80 coil with stainless steel wrap, is controlled by an adjustable thermostat and temperature limit switch for a maximum temperature 195° F. The frame is industrial coated 2” tubing equipped with a wand/hose rack and rolls on two 13” tires. Heavy duty trigger gun with a dual wand with side handle valve allows for user to switch from high pressure cleaning to detergent application and is equipped with quick change 0°, 15°, 25° and 40° nozzles.

Be sure to check the electrical requirements of the pressure washer and the compatibility with your electrical supply. If you have any questions just contact us or consult your local licensed electrician.
