Clean Storm 20211128, 2000 PSI 4 GPM Electric Pressure Washer, 5 HP, 230V, Cart-Mounted Cold Water System

Model Number: 20211128

Clean Storm 20211128, 2000 PSI 4 GPM Electric Pressure Washer, 5 HP, 230V, Cart-Mounted Cold Water System

Manufacturer: Clean Storm

Clean Storm 20211128, 2000 PSI 4 GPM Electric Pressure Washer, 5 HP, 230V, Cart-Mounted Cold Water System

Description

The Clean Storm 20211128 is a robust 2000 PSI, 4 GPM electric pressure washer powered by a 5 HP 230V motor, designed for heavy-duty commercial and industrial cleaning applications. Built on a heavy-duty tube steel cart frame with a durable industrial coating and 10-inch pneumatic tires, this cold water system delivers exceptional mobility, reliability, and cleaning performance. It features a totally enclosed thermal-overload protected motor, an industrial triplex plunger pump with ceramic plungers, and an integrated low-pressure chemical injection system for efficient detergent application.

Features

- Powerful 5 HP, 230V electric motor (26 Amp, Single Phase) with total enclosure and mechanical thermal overload protection.
- Industrial-grade triplex plunger pump equipped with durable ceramic plungers and stainless steel valves for longevity.
- Protected by a primary unloader valve and a secondary safety pop-off valve to prevent over-pressurization.
- Low-pressure chemical injection system activated via low-pressure detergent nozzles for seamless detergent application.
- Heavy-duty tube steel cart frame protected by an industrial coating with integrated wand and hose storage racks.
- Equipped with two large 10-inch tires for effortless maneuverability across job sites.
- Includes a 3-gallon onboard plastic chemical tank and a 50-foot by 3/8-inch high-pressure hose.

Applications

- Commercial building exterior cleaning, storefront washing, and graffiti removal.
- Fleet vehicle washing, truck fleets, service vans, and automotive detailing shops.
- Industrial plant maintenance, warehouse floor scrubbing, and heavy equipment wash-down.
- Property management facilities, parking garages, and driveway surface preparation.
- Agricultural equipment cleaning and dairy barn sanitation.

Clean Storm 20211128, 2000 PSI 4 GPM Electric Pressure Washer, 5 HP, 230V, Cart-Mounted Cold Water System

Specifications

Brand
Clean Storm

Model / Part Number
20211128

Water Type
Cold Water

Power Source
Electric Motor

Operating Pressure
2000 PSI / 138 Bar

Flow Rate
4 GPM / 15.2 LPM

Horsepower
5 HP

Voltage / Amperage / Phase
230 Volt / 26 Amp / 1 Phase

Mounting Type
Cart-Mounted with 10" Tires

Pump Thermal Protection
Mechanical

Max Pump Inlet Water Temp

Steambrite Supply

Clean Storm 20211128, 2000 PSI 4 GPM Electric Pressure Washer, 5 HP, 230V, Cart-Mounted Cold Water System

160° F

Hose Dimensions
50' x 3/8"

Power Cord Length
10'

Chemical Tank Capacity
3 Gallons (Plastic)

Pressure Connection
22mm

Shipping Weight
215 lbs

Physical Dimensions
37" x 23.5" x 36"

Cross-Reference SKUs

20211128

Clean Storm 20211128

CS-20211128

2000 PSI 4 GPM Electric Pressure Washer

CleanStorm 5HP 230V Pressure Washer

Tips and Additional Information
Ensure proper electrical supply matching the 230V, 26 Amp, single-phase requirements before installation. Inspect all high-pressure hose connections, 22mm fittings, and water supply lines for debris prior to startup. Verify that inlet water temperature does not exceed 160°F to prevent thermal damage to the triplex pump. Always bleed trapped air from the system by squeezing the spray gun trigger with the water supply turned on before powering on the electric motor. Store the unit in a frost-free environment during freezing conditions to avoid internal pump and coil cracking.
Frequently Asked Questions
Q: What are the electrical requirements for this pressure washer?
A: This unit requires a 230-volt, 26-amp, single-phase power supply. Ensure your facility or job site has the appropriate dedicated circuit and breaker installed prior to operation.
Q: Can this unit draw hot water?
A: The maximum pump inlet water temperature is 160°F. It is engineered primarily as a cold-water pressure washer but can accept pre-heated water up to that threshold.
Q: How does the low-pressure chemical injection work?
A: The chemical injector draws concentrated detergent from the onboard 3-gallon plastic tank and introduces it into the water stream when you attach and operate a low-pressure detergent nozzle.
Warranty & Safety Information
This product includes standard manufacturer defect warranty coverage on structural components, the electric motor, and the triplex pump assembly. Warranty coverage is voided if the unit is operated above its maximum pressure rating of 2000 PSI, exposed to water inlet temperatures exceeding 160°F, run dry without adequate water supply, used with improper electrical voltages, or subjected to modifications and lack of scheduled pump maintenance. Always wear appropriate personal protective equipment (PPE), including eye protection, and never direct the high-pressure spray stream toward humans, animals, or electrical sources.
