Clean Storm 894225, Blue 90-Degree Clear Nylon-Insulated Female Flag Solderless Crimp Terminal, .187in or 3/16in Tab

Model Number: 894225

Clean Storm 894225, Blue 90-Degree Clear Nylon-Insulated Female Flag Solderless Crimp Terminal, .187in or 3/16in Tab

Manufacturer: Clean Storm

Clean Storm 894225, Blue 90-Degree Clear Nylon-Insulated Female Flag Solderless Crimp Terminal, .187in or 3/16in Tab

Description

The Clean Storm 894225 Clear Nylon-Insulated Female Flag Terminal provides a reliable, high-performance 90-degree push-on connection ideal for compact electrical enclosures, automotive, marine, and industrial applications. Built with a translucent clear nylon insulator, this terminal allows for quick and accurate visual inspection of the wire connection inside.

Featuring a brazed seam barrel and a funnel-entry design, this terminal prevents wire strand hangs and barrel separation under crimping stress or operational vibration. The flexible nylon insulation offers superior heat resistance and structural integrity compared to standard PVC insulation, ensuring long-lasting performance up to 105°C and 600V building wire applications.

Features

- Clear Nylon Insulation: Translucent cover enables instant visual inspection of crimped connections.
- 90-Degree Flag Configuration: Designed for tight, space-constrained terminal blocks and relay spaces.
- Brazed Seam Barrel: Resists splitting or separation under heavy crimp pressure and operating stress.
- Funnel-Entry Design: Guides wire strands directly into the barrel for fast, hassle-free insertion.
- Color-Coded Blue: Standard color coding for immediate identification of compatible wire gauge ranges (16-14 AWG).
- High Thermal & Electrical Limits: Rated for up to 600V maximum (1000V max for signs/fixtures) and operational temperatures up to 105°C (221°F).

Specifications

Brand / Model	Clean Storm 894225
Terminal Type	Female Flag Solderless Crimp Terminal

Steambrite Supply

Clean Storm 894225, Blue 90-Degree Clear Nylon-Insulated Female Flag Solderless Crimp Terminal, .187in or 3/16in Tab

Orientation
90 Degree Angle

Tab / Mating Size
0.187" (3/16" Wide) x 0.020" or 0.032" thick tab

Wire Range
16 - 14 AWG (Blue)

Insulation Material
Clear Nylon (Fully Insulated)

Barrel Type
Brazed Seam with Funnel Entry

Voltage Rating
600V Max (Building Wire) / 1000V Max (Signs & Fixtures)

Temperature Rating
105°C (221°F)
