Yellow Clear Nylon-Insulated Y Butt Connectors Solderless Crimp Terminal 813205

Model Number: 813205

Yellow Clear Nylon-Insulated Y Butt Connectors Solderless Crimp Terminal 813205

Manufacturer: Clean Storm

Yellow Clear Nylon-Insulated Y Butt Connectors Solderless Crimp Terminal 813205 Nylon-insulated Y connectors are terminals that connect three wires to one central point. The nylon material is more flexible, pliable than other insulation types when crimping and resists heat better than other insulation types as well. The transparency of the insulation allows for easy inspection of wire connection, even after heating. The barrel shape of the 3-way butt connector (Y) allows for easy wire insertion and can be used in applications that utilize wire to transfer electrical current, including vehicles and buildings.

Nylon material is more flexible and pliable.
Crimps well and stands up to heat.
Industry standard color coding by gauge.
Rated to 600 volts maximum, building wire; 1000 volts maximum, 105° C (221° F)
