RAMP SELECTION CHART
Use this chart to choose the appropriate ramp length for your vehicle.

RAMP CAPACITY RATINGS
There are many methods that are used to give a ramp its loading capacity rating. Do not be fooled by the numbers. Our ramps are rated using a footprint 6" wide by 16" long.
Pressure is applied to the center of the ramp with this footprint. We then apply a three times safety factor to arrive at the weight our ramps are capable of loading safely. This gives you a true capacity rating that has the safety of you and your employees at heart.
Ask your ramp supplier how they arrive at their capacity rating.
