The PG5 (5.5 hp / 4.0 kW) is a powerful, compact and versatile planetary floor grinder perfect for smaller jobs. Available in both single phase and three phase. It combines a smart compact design for easy transportation with real work-horse performance and sheer grinding power. Thanks to the split-chassis design, the PG5 fits in most standard cars. It's easy to handle, tilt and operate with optional adjustable integrated weights for extra grinding pressure. Suitable for all applications: floor prep, grinding and polishing. The PG5 is the compact choice for the HIPERFLOOR™ concrete polishing system. To maximize reliability and reduce maintenance, the vital components of the PG5 are protected against dust and slurry inside the hermetically sealed grinding head and electrical cabinet.
