FastBreak HD
Heavy Duty Pre-spray and Traffic Lane Cleaner

Fast Break HD is the most ultra-concentrated (32:64-1) liquid preconditioning agent you can buy. Better than that, Fast Break HD is a VOC compliant formula that contains the industry exclusive component Tritanol™ – an integrated blend of specialized polymers, organic synthesizers, and surfactants. With the unprecedented cleaning power and performance of Tritanol™, you will experience deep restorative cleaning in high definition. It just works better!
Fast Break HD is packed with soil busting, grease cutting and dissolving ingredients with an unbeatable cleaning power that out-cleans competitive products – at a safe pH of 9.5. It has special thickening agents which allow it to contain 30% more active ingredients than other pre-sprays. At the standard dilution rate of 1:32, Fast Break HD melts greasy soils like nothing else. On lightly soiled carpets, you can even dilute as much as 1:64 and it’s still very effective.
Fast Break HD is so effective that it will produce outstanding results on even heavily soiled commercial or residential carpets, and yet it is so safe it can be used on all synthetic fibers, even commercial wool carpets when used as directed. The alkaline builders soften water, neutralize acid soling, dissolve and deflocculate ground in soil and sequester mineral deposits. They also help dissolve oil based soiling and prevent that soiling from re-attaching to the fiber. Finally, stabilizing additives hold the ultra-concentrated solids level of the formulation in suspension. Because Fast Break HD has a ready to use pH of 9.5, it can be used on stain resist residential carpets and is compliant with the warranty provisions.

Right to Know Info
Below is a list of components required to be disclosed under the California Cleaning Product Right-to-Know Act of 2017.
Ingredient Name | CAS# | Function | Designated List(s)
Water | 7732-18-5 | diluent
Dipropylene glycol butyl ether | 29911-28-2 | solvent
Sodium alkylnapthalene sulfonate | 532-02-5 | surfactant
Tetrapotassium pyrophosphate | 7320-34-5 | builder
Anionic polymers | mixture | withheld
Potassium hydroxide | 1310-58-3 | pH adjustor
Hexylene glycol | 107-08-0 | carrier
Amyl salicylate | 2050-08-0 | fragrance
Amyl cinnamal | 122-40-7 | fragrance | 23
