UPS
Urine Pre-spray Neutralizing Treatment
UPS is a special synergistic blend of acid neutralizers, detergents, odor counteractants, and decontamination deodorizers for use as a urine contamination neutralizer and as an acid detergent (tannin) spotting solution. UPS will effectively dissolve and dislodge alkaline salt residues that build up in urine deposits and neutralize sticky and gummy lipids and contamination which will make any urine deodorization solution work faster and more effectively.
The specialty surfactants carry the active ingredients deep into the carpet and help to penetrate the carpet fiber for more effective treatment. Used as a first response to urine deposits, because it contains an odor counteractant and decontamination deodorizer it can effectively eliminate odor on some urine deposits.
Pretreating the urine contamination with UPS makes all enzyme and encapsulating pet odor deodorization solutions work faster and more effectively. UPS is also an incredibly effective acid detergent spotter for treating tannin, salt, or alkaline based spots and spills on carpet and upholstery.
