USR with MultiPhase
Oxidizing Urine Stain Remover with Deodorizing and Stain Removal Power
USR with MultiPhase uses the effervescent cleansing, stain removal, and deodorizing power of activated oxygen synergistically combined with the encapsulating and bonding odor elimination power of MultiPhase. When applied as directed the vivacious, bubbling mixture goes right to work eliminating even the most stubborn urine stains, while the odor is eliminated through the power of oxidation and MultiPhase.
It chemically modifies and deactivates the stain, eliminates the odor, and does so without leaving strong and potentially offensive fragrances or perfumes behind. This state of the art formula also includes special additives to enhance solution penetration and improve rinsing and removal. It also contains anti-resoiling properties that keep the treated area from attracting residue.
Best of all, with USR with MultiPhase you use less product than with other powder oxidizers making it more economical.
Right to Know Info

Below is a list of components required to be disclosed under the California Cleaning Product Right-to-Know Act of 2017.
Ingredient Name | CAS# | Function | Designated List(s)
