HydraSolv
High Powered Tile and Grout Cleaner and Degreaser

HydraSolv is a high powered cleaning and degreasing agent specifically formulated for ceramic, porcelain, and quarry tile floors and their grout lines. It is used as a pre-spray/pretreatment on tile and grout to loosen, breakdown, dissolve, and emulsify even the grimiest of soils. It can be used on residential or commercial tile floors and other hard surfaces, indoors and outdoors. Its synergistic combination of surfactants, alkaline builders, and solvents blend to aggressively attack soils, and make the cleaning job faster and more efficient. It cleans porous grout lines without the use of harsh acids.
HydraSolv is formulated to work in conjunction with the RX-20 Rotary Extraction Tool with hard surface attachments, a rotary hard surface extraction and cleaning tool, or any high pressure wand compatible with hard surface floors. It can also be used as a pre-treatment on floors being cleaned with an auto-scrubber or in a mop and rinse system. HydraSolv is also an excellent cleaner for hard surfaces that have been exposed to fire and smoke as it effectively removes soot. HydraSolv can be used on virtually any colorfast hard surface – concrete, tile, and even natural stone when used as directed.
