Here is a cold water extractor that is perfect for any carpet cleaning job – the 1005LX Speedster®; carpet extractor.

The 1005LX Speedster®; was designed with cleaning professionals in mind. Like all Speedsters®, there are two 10-12 gallon tanks – one for solution and one for recovery. Each Speedster®; has waist-high switches and bucket-high drains. The Speedsters®; have 10' ball bearing wheels and 4' locking casters for easy mobility around the job site or even stairs. The Speedster®; is virtually as good as it gets when it comes to purchasing a carpet cleaner.

The 1005LX Speedster®; is:

Powerful – With a 500 PSI piston pump you get 182" of water lift (sea level) and 225-250 CFM.

Efficient – The 1005LX Speedster®; contains two 6.6 HP vacuum motors that provide maximum suction and airflow that cleans and dries carpet quickly.

User-friendly – With aluminum handles for easy loading and unloading. Easy-open vacuum tank lid, waist-high switches and other easy-access features that reduce bending. Locking casters that reduce machine movement. Dual 50' detachable power cords and a large hanger for storing hoses and cords.

Durable – With a housing made of tough roto-molded polyethylene the 1005LX Speedster®; resists rusting and denting.

Customer Service Covered – Mytee®; always offers a limited lifetime warranty and network of service centers.

The Speedster®; line of carpet extractors are powerful, portable, user-friendly and affordable. They have features that set them apart from the competition. Made at our California plant, our Speedsters®; undergo extensive factory testing to ensure that they meet rigorous quality standards. Mytee®; extractors are covered by the

>

strongest warranty in the industry. The housings are covered for life. Mytee®; carpet extractors represent the cutting edge in cleaning technology. Take on any job with confidence utilizing the Speedster®; combination of power and versatility. No one else even comes close.

Your machine has a brand new pump in it

Original owner of this machine used machine for 1 job, which rinsed out the factory installed anti-freeze used for shipping purposes. This customer left the equipment outside and let the equipment freeze and break the original Cat water pump and pressure gauge. Machine was returned and Dealer. Dealer installed the pump below as it has many advantages over the Cat water pump.

>

You can now use rinse aids and chemicals in the pump as long as you rinse out the pump head after the job is complete.

The original Cat water pump is a water only pump and you can never use any chemicals in the pump at all.

Pumptec pump can be rebuilt, Cat pump has to be replaced and cannot be rebuild.

To prevent freezing during your ownership, simply install an electric space heater on the lowest heat setting near your machine.

Additional Information

Note that both Mytee and SteamBrite reserve the right to change exact specifications without notice. What does this mean? It means that we do not open your boxes and Mytee will change the components that they use to build your machine. We verify the model number and voltage that is stamped on the box. We do not guarantee exact color or shade of your product though usually these ship in the blue family. In early 2018 Mytee is in the process of changing the rear wheels and front casters to a different size and specification. Other changes might also take place. What Mytee does guarantee is that the performance and the product is new and comes with the full manufacturer's warranty with its national service center locations. In other words, this is a 500 psi pump with dual 6.6 vacuum in a dual 10-12 gallon body style with dual 50 ft 12-3 power cords, but the exact pump model or exact vacuum motor, pressure gauge, or switch that is installed in your machine can be different. In the last year these machine have been built with Pumptec pumps, Cat Pumps, and General pumps. These are all great pressure pumps. The vacuum

>

motors have been consistent for many, many years with the same Electro vacuum motor used but this has not always been the case as some other brands have been used. This machine is now a Ametek Lamb motor. This machine claim to fame is the vacuum. 225 CFM X 182" of lift = 40,950 vacuum units. This is impressive. If you want to consider faster cleaning with a 13", 14", or even 15" wide cleaning wand, that is OK and recommended with this machine. Since you only have two power cords to use, the majority of energy is used for the vacuum and a little for the pump. If you are going to move up to 14 or 15" wide multi jetted tools or power wands, please consider having us upgrade your machine to pressure feed auto fill for \$400 more. These larger tools use water twice as fast and a traditional 2 jet cleaning wand. In carpet cleaning fill takes about 10 minutes and emptying takes on minute. This eliminates the longer of the too so you only have to drain your machine.

Optional
Clean Storm Pressure Feed Auto Fill Conversion Kit (Dealer Installed)
20130409

This machine plugs in everywhere. You can run this machine in an office building or older homes that only has dual 15 amp breakers. All you have to do is turn down the water pressure a little bit and keep the carpet cleaning wand on the floor. This machine does not have a heater because the size of the vacuum motors. I heat was added it would trip even a 20 amp breaker. If you want heat, please consider a external heater on a third power cord. You can purchase external heaters in 15, 17.5, and 20 amp styles. The other advantage to making the machine without a heater is that it is lighter than other heated or auto fill auto dump machines. 115 lbs dry use weight (no cords, no water) with all the extra handles installed on the machine means you do not have to purchase a ramp or hire a helper to load or unload your machine. The average maximum weight a healthy carpet cleaner can lift by himself is 150 lbs.
