Ships from KS Location

The HTC Red Twister pad is a 400 grit cleaning or polishing pad. The diamond floor pad can be used on terrazzo, vinyl, natural stone, and polished concrete. Twister pads come in a variety of grits and sizes for heavy duty cleaning of worn stone floors. HTC Twister Red will effectively remove scratches and stains from the surface and leaves a clean, matt surface prepared for the subsequent Twister® steps. Two pads come per package.

Just Add Water

The unique Twister pads make the floor both cleaner and more attractive. The result is a beautiful floor! The secret is that each HTC Twister pad contains billions of microscopic diamonds that not only effectively clean but also polish the floor during daily cleaning. The difference between the various pads is the size of the diamonds - shifting the basis between cleaning and polishing. This enables you to upgrade a dirty, dull floor to a cleanshiny one. Continued use of Twister Green maintains the floor's clean, shiny condition.

Quality and simplicity

Twister pads can be used on all types of flooring and are available for most commonly used floor cleaning machines. When the color disappears from the pad, it is time to replace it. This normally occurs after, on average, 30 000 m2.\* The wear indication makes it easy for the operator to know when to change pads and thus maintain optimal performance. Regular use reduces and can even eliminate the need for extra, costly periodic maintenance since Twister provides a high, consistent quality through daily cleaning.

Reduced environmental impact

The focus from organizations and companies on environmental issues has never been greater. Analyzes of the entire operation, with the aim of finding alternative solutions to reduce environmental impact without reducing the quality or increasing the cost are an ongoing process. Twister does not require any chemicals in daily cleaning to keep the floors clean and shiny. For floors that require floor finish, Twister will reduce the frequency of the periodic maintenance. In addition, using Twister reduces the amount and management of waste and residues. Twister pads are made from recycled PET for minimum environmental impact. By choosing Twister as your standard method for floor maintenance you will actively, easily and effectively reduce your business environmental impact.

Where can HTC Twister be used?

>

- Natural stone
- Terrazzo
- Vinyl
- Linoleum
- Ceramic slabs & VCT
- Rubber
- Wood
- HTC Superfloor; - polished concrete

Twister Standard or Traditional Pads

Twister Red - 400 Grit is a single grit diamond pad designed to be the 1st step in the traditional 4 step floor restoration process. Red Twister Pad are good for Deep cleaning, top-scrubbing and preparation for any upgrade procedure.
