Ships from the SC location.

An ogee is a decorative line formed by two connected curves. The upper curve is concave, or bowed inward like the inside of a bowl. The lower curve is convex, or curved outward like part of a sphere. When the two curves are linked together they form an S-shaped curve.

Works best for natural stones including Granite, Marble, and all other natural stones.

## Product Description

Profile Wheels are for commercial and residential applications of natural stones as well as some synthetic materials. This blade can be used for decorative edging jobs in four popular shapes.

Use on Husqvarna TS70 and TS60 Tile saws
