Rivian R1S SUV Compatible 40Amp ADJUSTABLE Type1 Level2 14-50p Electric Car Ev Charge 20230823 653341065940

Model Number: 20230823

Rivian R1S SUV Compatible 40Amp ADJUSTABLE Type1 Level2 14-50p Electric Car Ev Charge 20230823 653341065940

Manufacturer: Clean Storm

Rivian R1S SUV Compatible 40Amp ADJUSTABLE Type1 Level 2 J1772 X 23 ft 14-50p Electric Car Ev Charger Cable Freight Included 20230823

Adjustable means you can change the speed in which you want to charge at. Adjust from 40 amps, 32 amps, 24 amps, or 16 amps. See below for benefits.
Ships from San Antonio TX location
(LEVEL 2) EV CHARGING CABLE Model: PCD-040-40Amp (J1772)
Connector: Type1
Certificate: TUV, CE, UL
Input/Output: 230V - 240V AC
Frequency: 60Hz
Current: 40A
Power: 8.8kw
Length: 7 meters (23 ft)
Color: black
Operating temperature: -25â„ƒ to +55â„ƒ
IP Class: IP66
Cable: Straight
IP66 - High Strength Aircraft Grade Aluminum Socket Handle

Now Rivian R1S SUV compatible Level 2 40A, 220-240V NEMA 14-50 plug EV Charger, which could charge your car upto 8x faster than other EV charger you ever used!

HIGH SECURITY

Our 20230823 EV charger adopts High Strength ABS material, which has better quality and can be used for longer. Our chargers have over-current protection, over-voltage protection (to help protect your car's computer), under-voltage protection, leakage protection, overheating protection Waterproof rating of IP65 and other safety protection measures, they can keep your car charged safely and avoid fire.

HIGH COMPATIBILITY
Unlike normal EV chargers, Our EV charger is compatible with ALL electric cars,

Rivian R1S SUV Compatible 40Amp ADJUSTABLE Type1 Level2 14-50p Electric Car Ev Charge 20230823 653341065940

which accept the SAE J1772 standard receiver. All of our products have passed CE certification and German TUV certification, and the quality is trustworthy

Why Adjustable?
Set to 16 amps @ 240 volts, 24 amps @ 240 volts, or 32 amp @ 240 volt or even super fast 40 amp. The more time you have to charge your car, it's best set to the lowest setting.
Example, if I have the entire night and can leave the car on charge for 6 hours, set to 16 amps. If traveling and using the optional Reverse14-50R box below, set to 16 amps. If stopping at home for lunch and only have an hour before I leave again, set to 32 or 40 amps. If I only have about 4 hours to charge my car, set to 24 amps.
1. 40 Amp @ 240 volt is super fast charging when you need fast charging.
2. The longer and slower you take to charge your batteries, the longer the batteries will last in both years as well as per charge. (Changing all the car batteries is expensive and this charger will maximize their lifespan!) Your batteries will last longer in both years before they will no longer hold a charge was well as each charge is more complete (each individual charge last longer.)
3. Take with you on the go. See below. Set to 16 amp and use the optional travel converter box below.

Optional: No Electrician Required to Move Up To Level 2 Charging!
Power Joiner Step Up Inverter Level 2 Electric Car Charger Converts Dual 20amp 120volt outlets To 240volt 4wire 20amp 14-50R Level 2 [Reverse14-50R]
See video on link
Adjustable to use with this power box. Change setting to 16 amp @ 240 volt and take with you. Charge at work, friends home, traveling, anywhere standard 120 volt wall outlets are available! Plugs into every building in USA, Canada, Mexico, and Japan and makes 240 on the go and Level 2 speeds!

1st Generation charging cables 16 amps at 120 volts
2nd Generation charging cables 16 amp at 240 volts
3rd Generation charging cable 32 amp fixed speed at 240 volts
4th Generation charging cable 32 amp Adjustable charging speed at 240 volts
5th Generation charging cable 40 amp Adjustable charging speed at 240 volts (this unit)

1 Year Factory supplied warranty.

Rivian R1S SUV Compatible 40Amp ADJUSTABLE Type1 Level2 14-50p Electric Car Ev Charge 20230823 653341065940

Yes
Optional travel converter box available. Extended battery life.

All the charges on the above list will work with 99.9% of the cars sold in the USA that accept the Type 1 J1772 grip.
Companies advertise that these charging cables are 25 feet long because the J1772 plus the box each add a foot of length to the 23 feet of cable length. 23 feet of cable plus one foot for the J1772 grip plus 1 foot for the box = 25 feet.
Level 1 chargers that are included with you car purchase are 120 volt 16 amp and will take about 20 hours to charge a car.
All the above chargers on the list are level 2 chargers.
16 Amp 240 volt chargers will take 6 to 8 hours to charge most cars.
32 Amp 240 volt chargers will take 4 hours to charge most cars.
The optional travel converter box can only be used with chargers that charge at speeds of 16 amp at 240 volts or less. This is why the adjustable chargers have optional travel boxes and the fixed 32 amp chargers to not have optional travel boxes.
Adjustable chargers give you the option to slow down the charging speed to extend overall battery life and maximize the drive time per charge or speed up the charging speed when needed.
Item 20180815 is unique as it combines the travel box with a level 2 charger and eliminates the need to hire an electrician to move up to level 2 charging speeds.
Level 3 chargers are a DC current based charging technology and are limited to a very small select group of electric cars and are designed to charge cars in under one hour and are not included in our list.

PLEASE INSTALL A WHOLE HOME SURGE AND LIGHTNING ARRESTER PROTECTION TO PROTECT BOTH YOUR CHARGING CABLE AND THE CARS COMPUTER!
LIGHTNING STRIKES ARE NOT A MANUFACTURE DEFECT AND WILL NOT BE COVERED.
Please do not plug in an expensive car and allow a lighting strike to ruin your investment. In the photo to the right, the round item below the box, on the left is the lightning arrester, the rectangular item on the right is the surge protector. These can be installed under the main panel or in the panel (if you have room).
Photo shows lightning arrestor Delta LA302RG and Siemens FS140 whole home surge protector. It does not have to be these brands. If you do nothing and lighting strikes your neighborhood, the internal surge protection should protect your car but you charging cable will be ruined. Please protect your entire home, as now your dishwasher, refrigerator, clothes washer, and even coffee maker all have computers in them and have to be protected. In the spring time we always have customer that need warranty consideration after that fail to properly protect their home. This is not a manufacture defect if you to not install the correct electrical protection for your charging cable. This is the ONLY reason your charging system will quit working in the springtime. .
