Hydrotek ANT29 Hydro Twister 28in Professional Surface Spinner Wand

Manufacturer: Hydrotek

Professional HYDRO TWISTER

Model# ANT29, Large, airless rear tires, adjustable pressure valve, 28" deck with new 4 nozzle spray arm and hoop handle folds for storage.

Description

The Hydro Twister® industrial flat surface cleaners are the ideal choice for cleaning concrete surfaces without the need for soap pretreatment. A Hydro Twister rotary surface cleaner connects to your pressure washer to allow for more consistent cleaning than an operator with a wand and reduces operator fatigue.

The Hydro Twister uses both cold and hot water up to 250 degrees, on many models, offering easy cleanup of a number of surfaces. Hydro Tek Systems manufactures a number of Hydro Twister models, so you will be able to tackle your dirty patios, garages, concrete sidewalks, school yards, factory and warehouse floors, restroom floors, food processing floors, service stations, concrete parking lots, pool decks, sport courts, roofs, loading docks, tile flooring, stadiums, marina docks and cleanup of moss, mold and mildew. Hydro Twisters also get the job done 10- 20 times faster and with less water consumption than a hand wand. The Hydro Twisters use a rotating spray bar that operates right above the ground for a thorough clean that eliminates grease and grime much more efficiently than wand methods. The TRIDENT HYDRO TWISTERS® clean more square footage than others in their class. The proprietary aluminum spray arm with compound angled nozzles not only clean up to the edge but also push water aside to create more impact on the surface they clean. All stainless, rustproof deck and handle construction will keep your surface cleaner working and looking great for years.

Choose the caster version with three non-marking casters that allow the operator to freely move side to side or forward. Handle is free floating and folds flat for storage. The high pressure hose is protected inside the stainless handle tubing, ready for you to connect the pressure washer trigger gun.

>

If you are looking for a pressure adjustment feature to wash more delicate surfaces or are cleaning large areas, choose the fixed rear wheel option. A front non-marking caster paired with two large, airless tires reduce fatigue when working in straight lines. Dial up or down the pressure as needed from the hoop handle which folds down for carrying or storage.

Optional 22mm Female Swivel Socket X 1/4" Mip Pressure Washer Coupler
